

**Miracle Service™ Announces Software Integration with Print Tracker™****Dateline – Mississauga, Ontario, Canada and Boise, Idaho, USA**

Nexent Innovations Inc., a globally recognized leader for service management software development for the imaging device industry, has announced the automated integration of its Miracle Service's world-class service management software with Print Tracker's meter collection solution.

Meter information gathered by Print Tracker is seamlessly integrated into the Miracle Service software, where cost-per-click invoices are then automatically calculated and generated based on customer contracts. Integration saves time, increases accuracy, and increases efficiency through fully automatic, hassle-free meter collection and billing.

"The Miracle Service integration with Print Tracker is yet another step in our commitment to offering premiere service management solutions, which leverage software and program platforms our clients already have in place today," stated Robert Sombach, Vice President Operations and Development for Nexent Innovations Inc. "Through this recent integration with Print Tracker, our customers experience accurate, robust integration with their meter collection and billing processes, which improves efficiencies and leads to new opportunities for cost reduction."

In addition to meter collection management, Miracle Service software supports the complete service life cycle for office equipment dealers. Fully integrating CRM, sales, dispatching, technician scheduling, inventory, billing and mobile field service, Miracle Service streamlines operations into a single system.

Visit the Miracle Service website to learn more about their unique modular approach to supporting office equipment dealers at [www.miracleservice.com](http://www.miracleservice.com).
